Christoph,

I would like to thank you and Britco for supplying us with what is now the home of our new live-in firefighters.

After a long search for an affordable solution to our housing issue we became confident that Britco would be our preferred supplier. Throughout the process the service offered by your office was much appreciated as we were not familiar with modular construction or options available to us. Through our first on-site consultation to installation day our project progressed smoothly. This was welcome as we were implementing a new fire service work experience program which relied on the accommodations being in place.

Since that time we have been very satisfied with both product and service. The firefighters are finding their accommodations sufficient and have deemed the building as their home.

Thank you again; we look forward to working with you in the future.

Sincerely,

David Tomkinson
Fire Chief
City of Merritt
